

EGESERAMİK

2025

Perfect Nature, Perfect Beauty

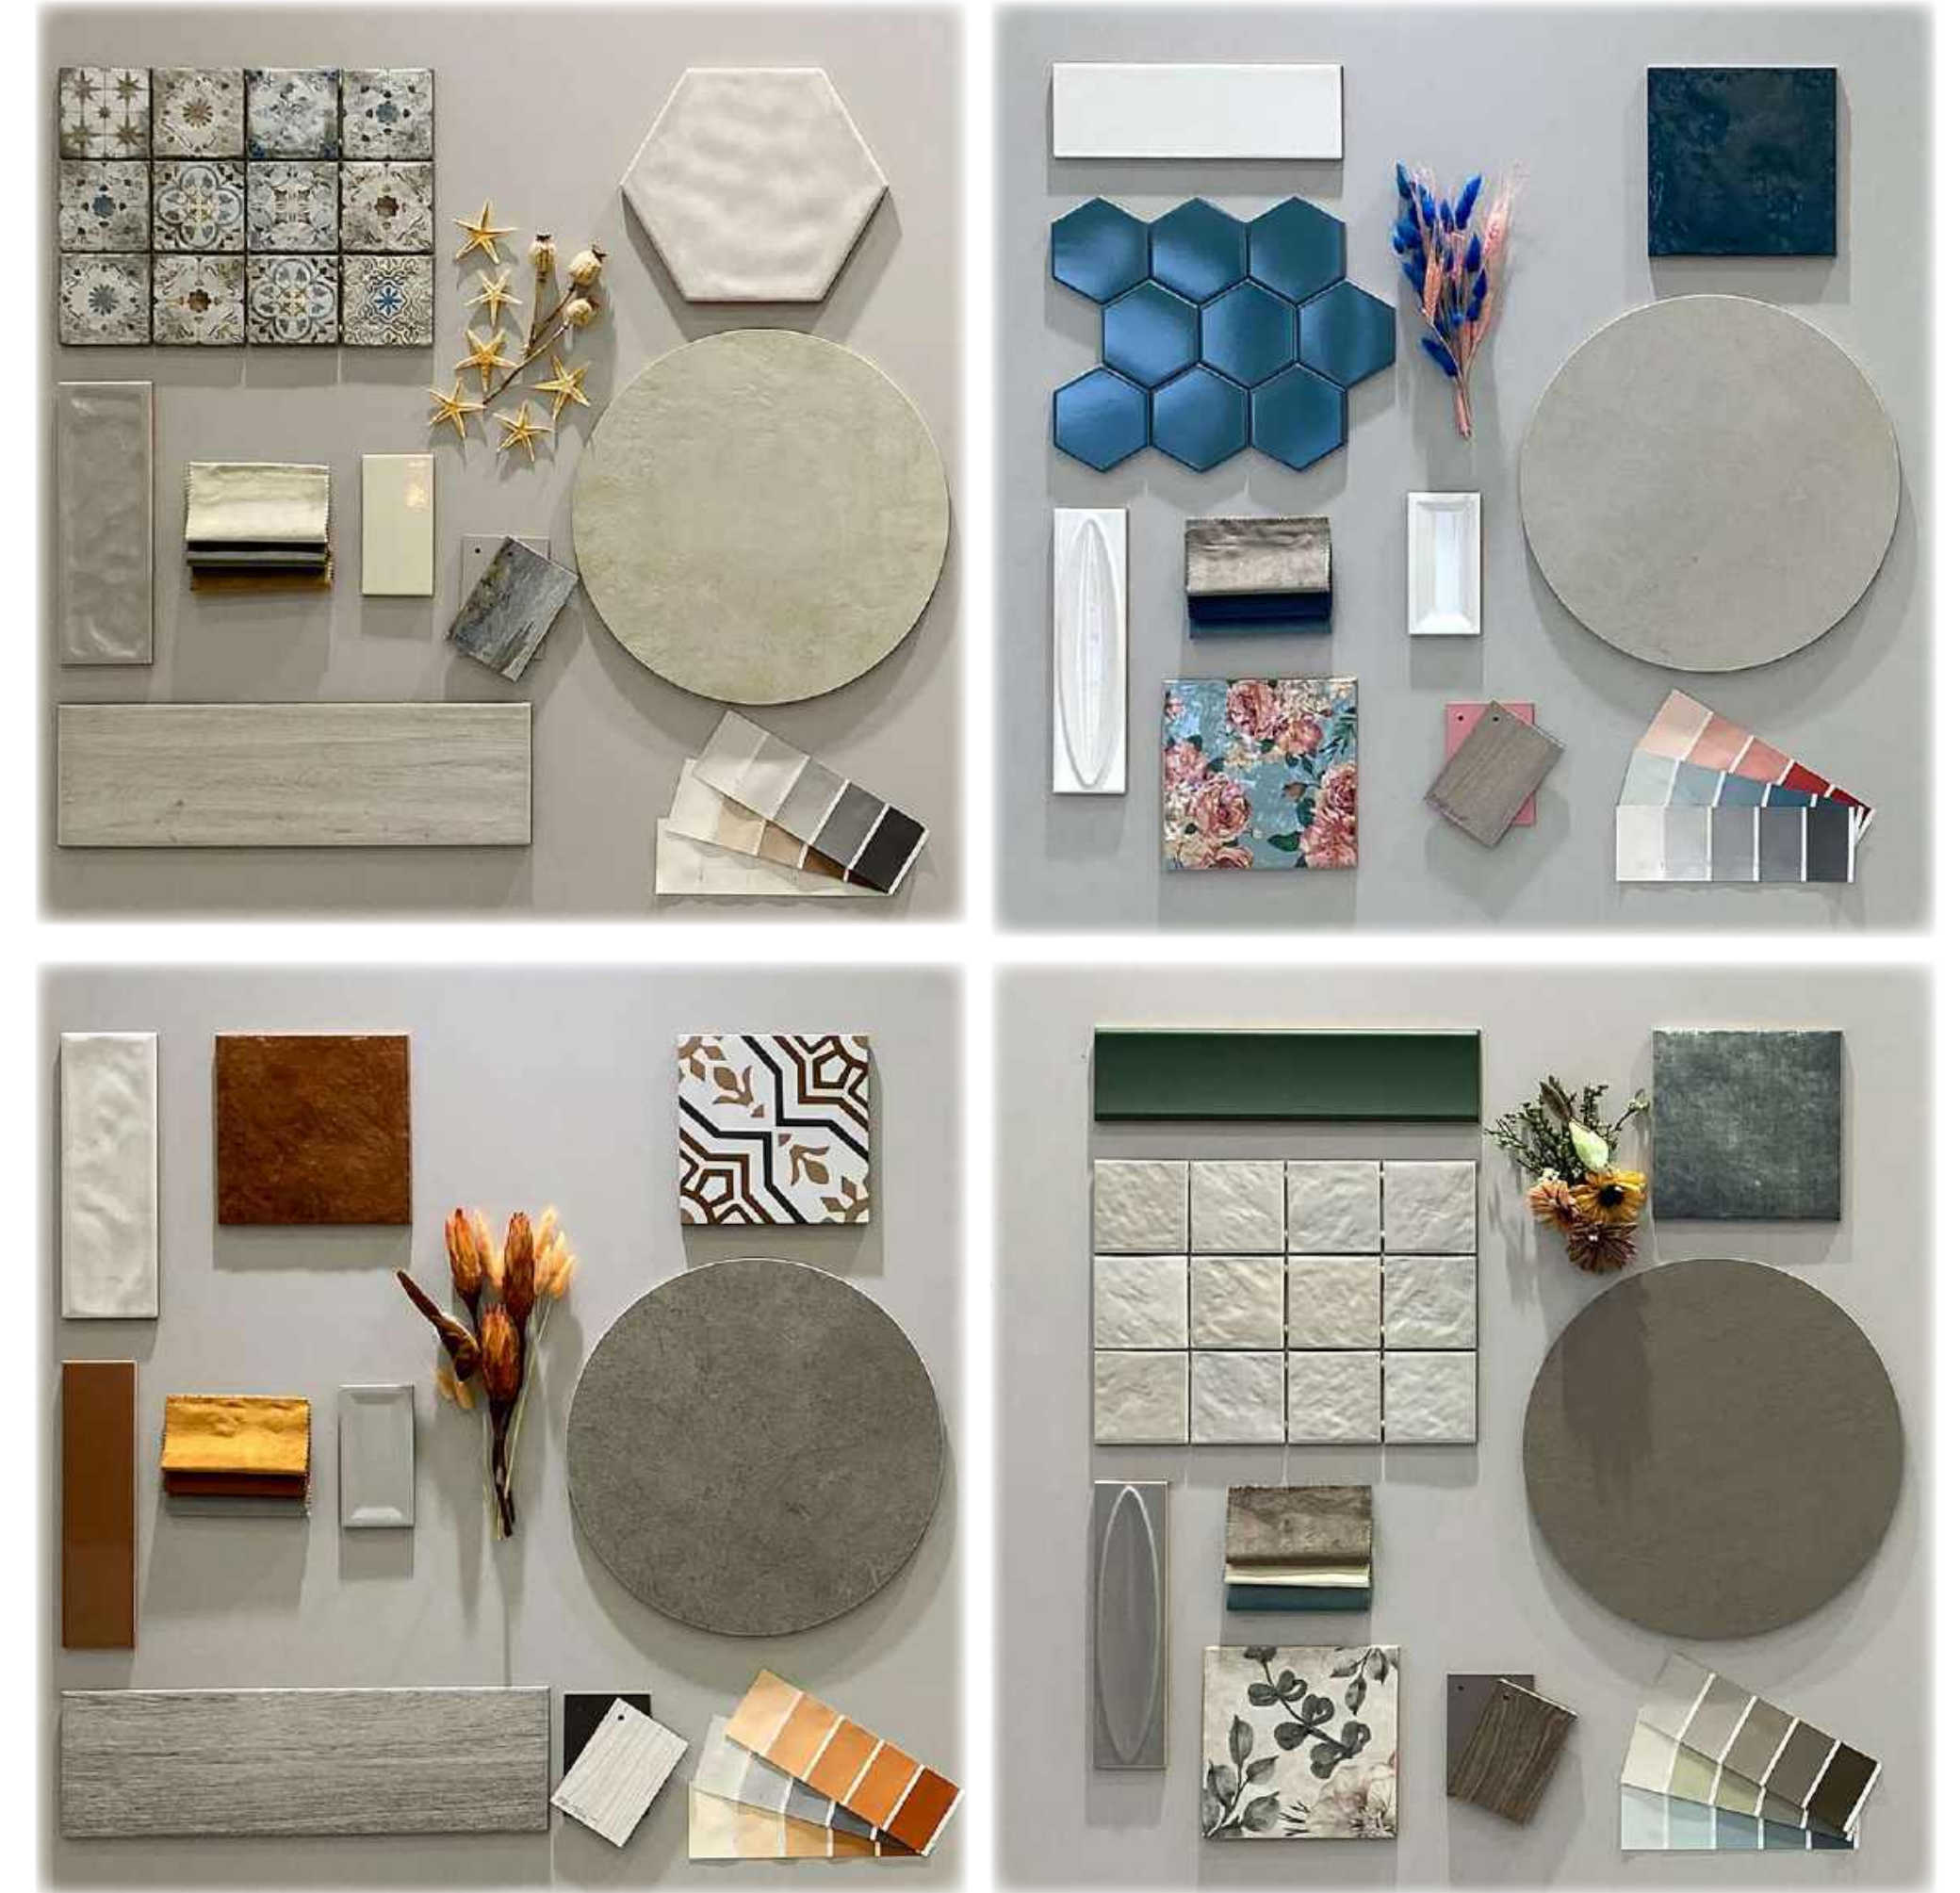

Since the earliest days of humanity, soil has been considered the foundation of life, continuously evolving and transforming into countless forms. Drawing strength from this very earth, **Ege Seramik** has been bringing together design, technology, and functionality for half a century. With the slogan “**Perfect Nature, Perfect Beauty**” it continues its product journey with an environmentally respectful approach and a commitment to world-class production and service standards.

THE TRENDSETTER IN THE INDUSTRY

Since its establishment, Ege Seramik has maintained its innovative and dynamic structure. Rather than merely following trends in the ceramics industry, it embraces the mission of setting them, reflecting its commitment to innovation and creativity in its logo. While achieving many industry firsts in production, sales, and marketing, the company firmly believes that quality and customer satisfaction are the key pillars of success.

Its unique design capability and innovative product portfolio, enriched with high-tech materials, fully meet the demands of global markets.

ANTIACIDE

Antacid products are products developed for production facilities, R&D centers, automotive industry services, industrial kitchens, laboratories, pharmaceutical factories and similar areas where chemical products are used and areas of intensive use.

It differs from other ceramic products with its technical features such as high resistance to impact and pressure, resistance to heat and frost, easy-to-clean, stain-resistant, acid-resistant surface, and sufficient anti-slip value for recommended areas.

ANTIBACTERIAL

Ege Seramik Antibacterial products are used to protect human health. especially in environments where cleanliness and hygiene conditions are important. Such as health institutions, educational institutions, industrial kitchens.

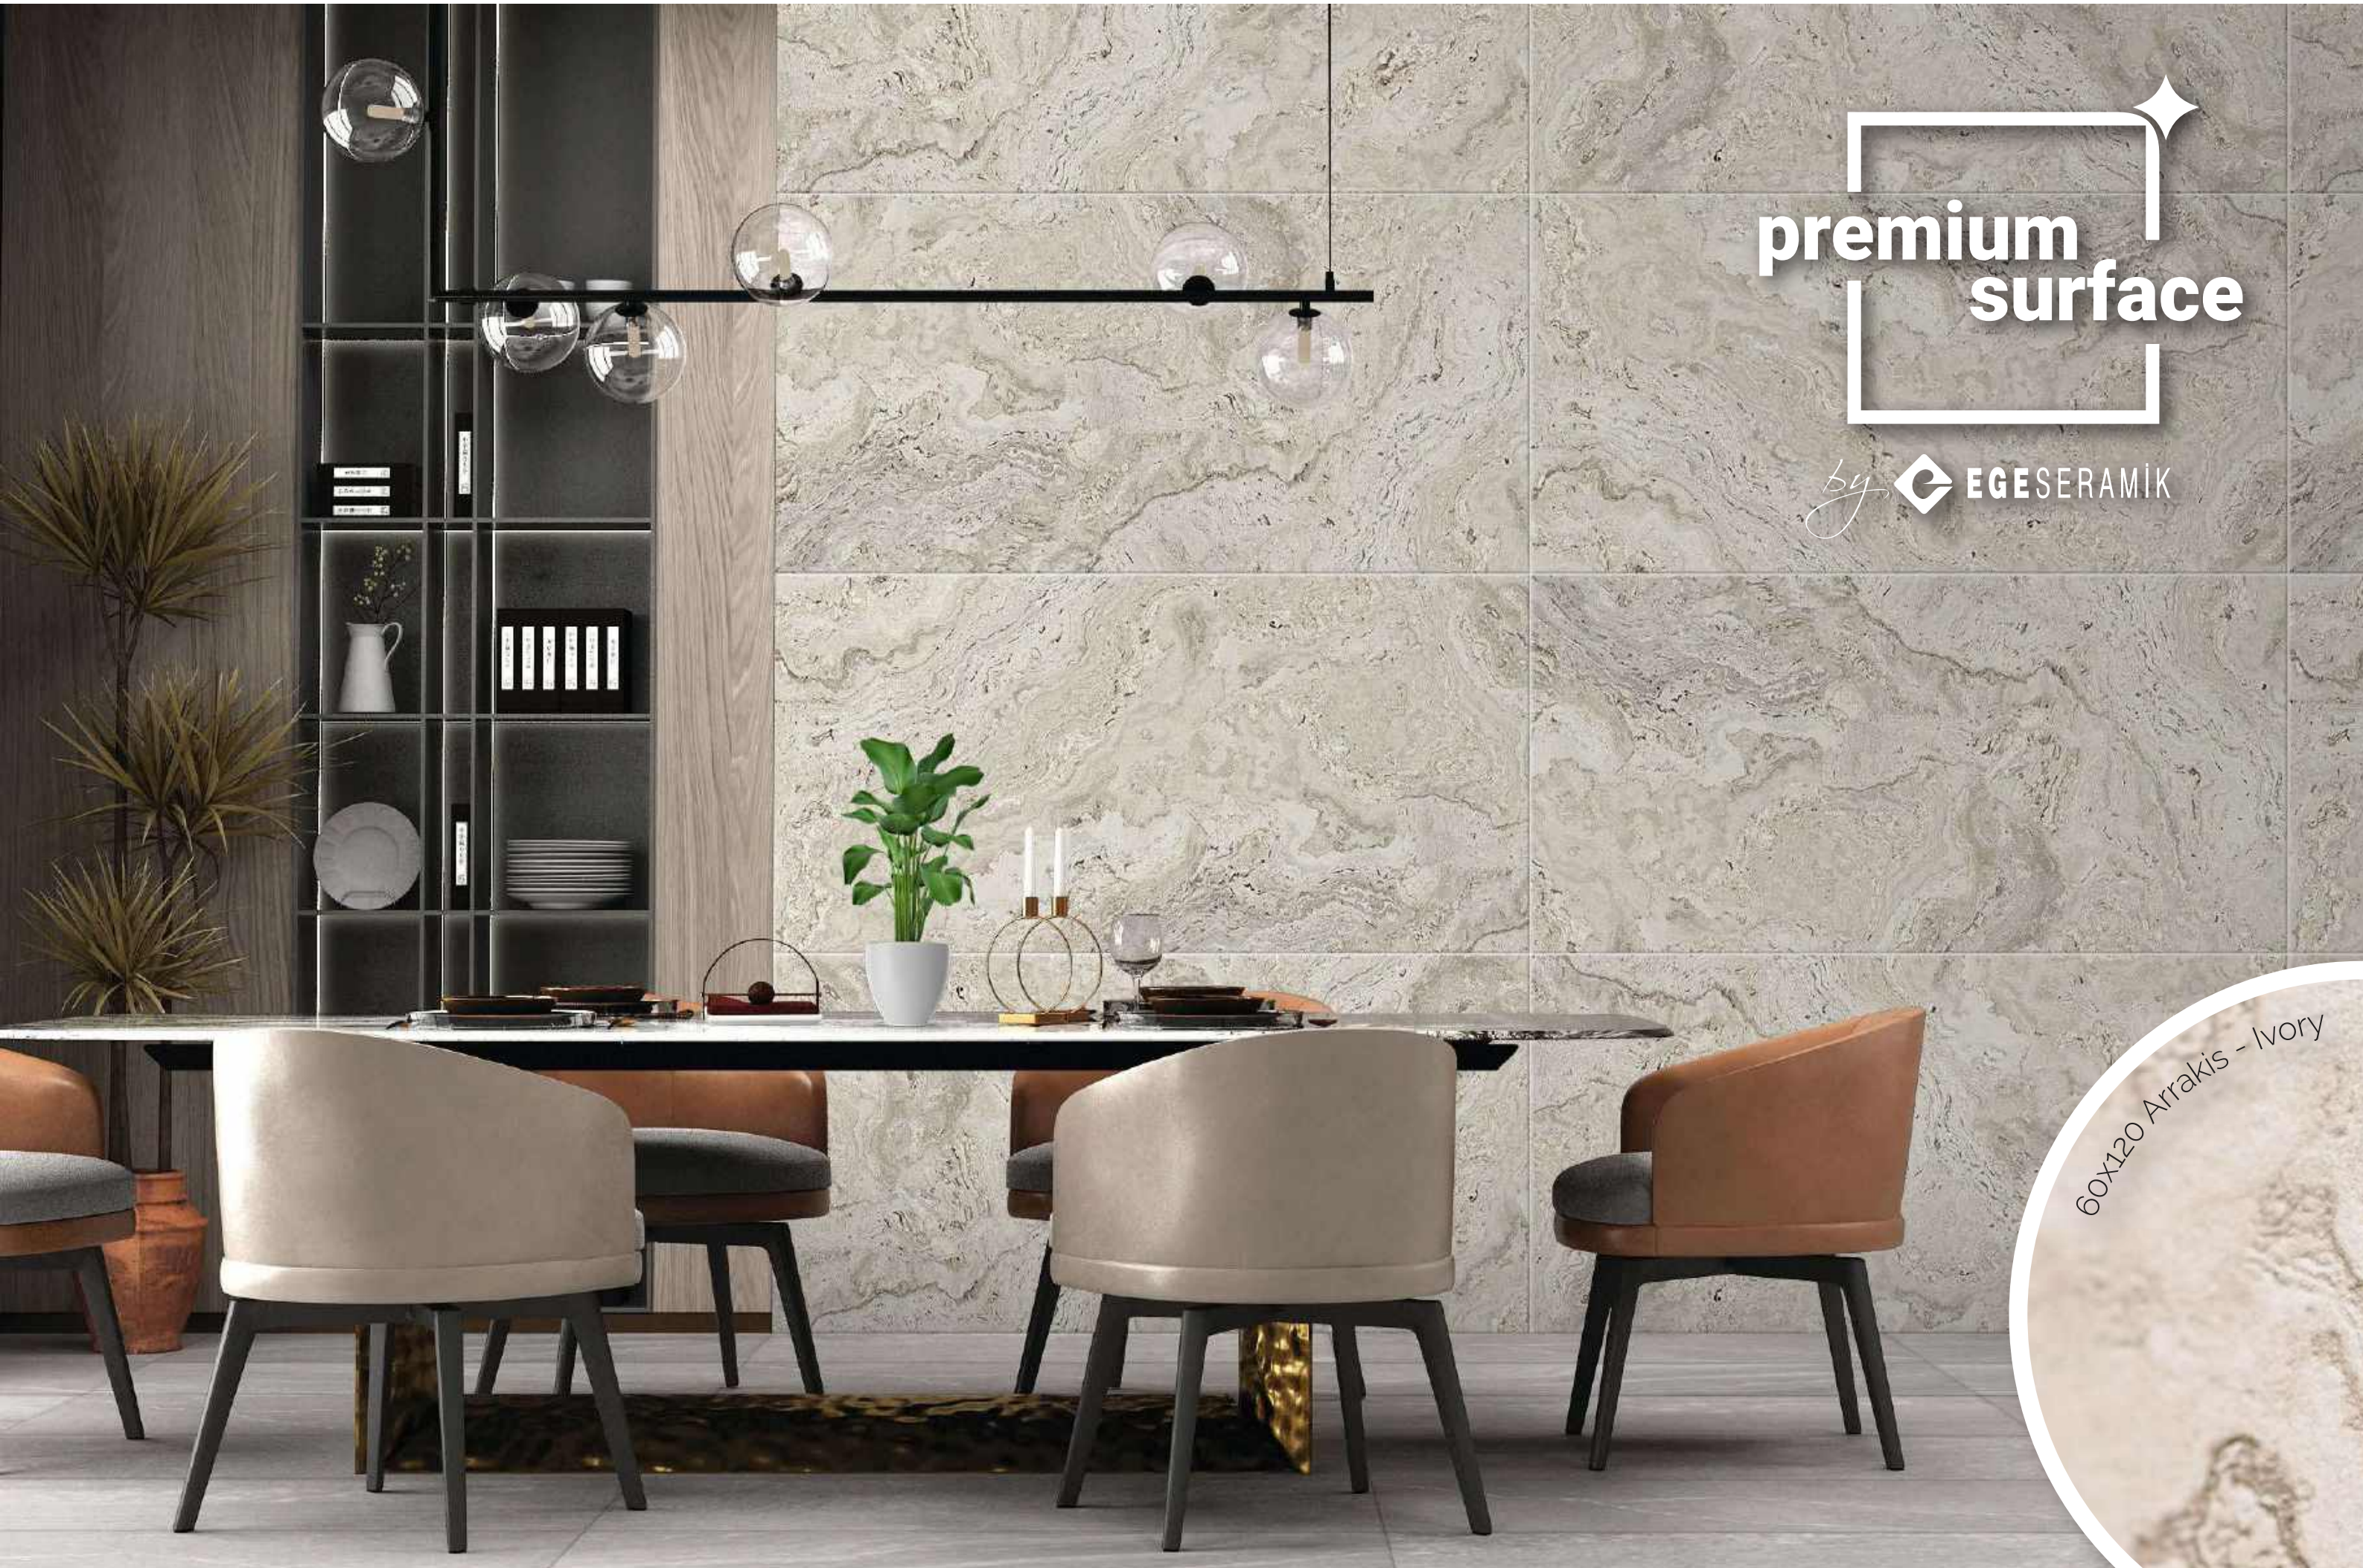

Bacteria that can easily survive on hospital floors and in kitchen conditions in the food and beverage industry are a serious risk to human health. In such conditions, the importance of antibacterial products becomes evident.

“Premium Surface”

In 2024, Ege Seramik made a major investment in its facility by adding a brand new production line with "Premium Surface" technology as well as by implementing continuous modernized integrations on existing production lines to improve production efficiency.

"Premium Surface" technology allows the creation of special finishes that give 3D depth and natural look, with various special effects.
